SIVA KRISHNA KARRI

Senior Unity3D XR/VR Developer

+91-8639277629 | siva.unity3d@gmail.com | Hyderabad, India

PROFESSIONAL SUMMARY

Senior Unity3D Developer (9+ years) specializing in VR/AR training simulations, Digital Twin solutions, enterprise XR applications, and 3D game development. Proven track record of leading cross-functional teams, delivering 20+ enterprise projects, and optimizing Unity applications for 30–40% performance gains. Skilled in Unity3D, C#, XR Interaction Toolkit, Digital Twin visualization, multiplayer networking.

TECHNICAL SKILLS

Graphics & Rendering: Unity3D, WebGL, HLSL, Shader Graph, Particle Systems, Post-Processing

AR/VR/MR Development: Oculus, HoloLens 2, ARKit, ARCore, Vuforia, OpenXR, MRTK, XR Interaction Toolkit, Meta Quest 3/2

Programming Languages: C#.Net, TypeScript, JavaScript, React Native

Performance Optimization: Unity Profiler, Memory Management, Low-Latency Techniques, GPU Instancing, Texture Atlasing

Multiplayer Networking: Photon PUN2,Mirror.

Design Patterns & Architecture: MVC, Singleton, Observer, Factory, Builder

Cross-Platform Development: Android, iOS, Windows, Mac, Quest 2/3, HoloLens 2

Version Control & Tools: Git, Visual Studio, Unity Editor Extensions, Firebase, JSON, REST APIs

PROFESSIONAL EXPERIENCE :

Senior Unity3D XR Developer

Metaloga Private Limited (Reinvision Labs Pvt Ltd) | Hyderabad, India | Mar 2024 – Present

- Architected and developed immersive VR/XR solutions across healthcare, aviation, and renewable energy using Unity3D, MRTK, and Meta Quest.
- Delivered VR therapy, aviation training, and wind-energy training and visualization solutions for enterprise clients including Vestas and Suzlon.
- Integrated third-party APIs for real-time data synchronization, analytics, and reporting, improving data-processing efficiency by 40%.

Senior Unity3D XR Developer

Reinvision Labs Pvt Ltd | Hyderabad, India | Feb 2021 – Feb 2024

- Built comprehensive VR/MR aviation training simulations, including cabin crew and pilot training modules serving 500+ aviation professionals.
- Developed and integrated REST APIs for content updates, application data, and performance-tracking dashboards, reducing manual update time by 60%.
- Developed custom shaders and optimized rendering pipelines to improve visual fidelity while maintaining VR performance.
- Served as the primary technical liaison for client feedback sessions, demonstrations, and deliverable approvals across 10+ enterprise clients.
- Implemented performance optimization techniques that improved frame rates by approximately 30% and reduced application loading times.

Senior Member of Technical Staff — Senior Unity3D AR Developer

Kiksar Technologies Pvt Ltd | Bangalore, India | Dec 2018 – Dec 2020

- Developed AR fashion virtual try-on and beauty applications using ARCore, XZIMG, and AR Foundation.
- Created real-time AR facial tracking systems for virtual makeup, accessories, and beauty-product visualization.
- Optimized AR applications for mobile devices, improving application stability and reducing crash rates by 45%.
- Collaborated with UI/UX teams to develop intuitive AR experiences and improve overall user engagement and retention.

Senior Unity3D Game Developer

Pixel Games Studio | Hyderabad, India | Aug 2017 – Dec 2018

- Developed mobile 3D games across racing and open-world action genres with realistic physics systems and advanced AI behaviors.
- Implemented multiplayer networking using Photon for real-time multiplayer gameplay.
- Optimized gameplay, rendering, and application performance for mobile platforms.

Unity3D Game Developer

Capital Numbers Infotech Pvt. Ltd | Chennai, India | Jan 2017 – Jul 2017

- Developed simulation and educational games for healthcare training.
- Implemented interactive gameplay systems and training experiences using Unity3D.

KEY PROJECTS & ACHIEVEMENTS

VR Training & Industrial Simulation — Renewable Energy
Developed immersive VR training, safety, operations, and visualization simulations for renewable-energy and industrial environments, including Vestas, Suzlon, substations, and WWIL, using Unity3D and XR technologies.

Aviation Cabin Crew Training VR
Built realistic VR safety and operational training modules for aviation professionals, supporting cabin crew training and serving 500+ users.

Digital Twin — WebGL
Developed a Unity WebGL-based Digital Twin for interactive visualization and simulation of the BOF (Basic Oxygen Furnace) steel-making process, enabling browser-based 3D process monitoring and visualization.

Relversiv VR Therapy Platform
Led development of a VR-based chronic pain relief application featuring immersive guided exercises and therapy experiences, serving 1,000+ users.

AR Fashion & Beauty Virtual Try-On
Designed and developed a real-time AR application enabling users to virtually try clothing, accessories, and beauty products using face and body tracking.

Olivia VR Application
Developed a VR-based hair-removal treatment simulation and training application with immersive 3D environments, step-by-step procedural guidance, and safety instructions.

Find The Sniper — Windows Training Application
Developed an interactive Windows-based training simulation for locating hidden targets across urban buildings, forests, and varied terrain environments.

Unity3D Game Development
Developed and optimized multiple mobile and PC titles, including Ultimate Bike Stunts 3D, Real Car Driving Simulator, San Andreas American Gangster 3D, Swords & Crowns, Bowmen 3D, and an online cultural competence simulation for healthcare training.

EDUCATION

Bachelor of Technology (B.Tech) - Electronics & Communication Engineering

JNTU Kakinada | 2013
